## DETAILED ACTION

### *Double Patenting*

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-11 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-11 of prior U.S. Patent No. 6,874,616. This is a double patenting rejection.

Claims 12-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 12-18 of U.S. Patent No. 6,874,616. Although the conflicting claims are not identical, they are not patentably distinct from each other because the resilient biasing mechanisms have rotary and/or vertical shifting at the ends of the support out from under the conveyor belt that allow for resilient shifting of the support, even though the claims in the current application do not require them to have rotary and/or vertical shifting.
